ERRATA CORRIGE to:
Technical Report ucsc-crl-06-18
School of Engineering
University of California, Santa Cruz

- Page 9, right column, 8th line from the top: the correct equation, and the one that is used our code, is:

$$d(r, r') = \max(I_{tot}, D_{tot}) + M_{tot} - \frac{1}{2} \min(I_{tot}, D_{tot}).$$

As stated above, the error concerns only the technical report, and not the code we used to evaluate the Wikipedias, which was in fact correct. Thus, the correction does not lead to any change in results.
